

Yu-Chia Chen

Lead LLM Post-training @ Meta (MSL)

(208) 329-8707 | yuchiac@outlook.com | linkedin.com/in/yuchaz | yuchaz.github.io

SUMMARY

Staff Research Scientist at Meta Superintelligence Lab (MSL) specializing in NLP and LLM post-training, leading safe, aligned GenAI products from concept to launch.

- Drove measurable global growth by double-digit user engagement grows for AI Characters chatbot
- Delivered tens of millions revenue and achieved a +6.7% performance gain for LLM-powered ads text generation, with results featured in TechCrunch (yuchaz.github.io/press/202305-techcrunch/) and Import AI (yuchaz.github.io/press/202508-importai/)

TECHNICAL SKILLS

Expertise: LLM; NLP; Reinforcement Learning (RL) post-training (Reward modeling/RLHF/RLUF); Technical Leadership (TL)

Programming: Python: PyTorch, NumPy, Pandas (Advanced); SQL: Presto, Spark (Advanced); C++ (Intermediate)

EXPERIENCE

Staff Research Scientist

Sep. 2021 – Present

Meta

Seattle, WA

Directed multilingual expansion for AI Characters via first-party social data post-training @ MSL

- Achieved double-digit user engagement growth through hybrid SFT-RL post-training on first-party social data for cross-cultural adaptation and safety alignment
- Scaled to 50+ languages by architecting multi-year roadmap using pivot coverage and cross-lingual transfer

Led high-performing ads generation via large-scale RL from user/ranking feedback (RLUF) @ Monetization GenAI [1]

- Delivered tens of millions revenue by leading a two-year, cross-org personalized LLM post-training roadmap
- Achieved +6.7% performance gain by architecting MORL post-training framework, co-optimizing ad performance and brand value
- Grew adoption more than doubled by enabling automated opt-in flow for advertisers through LLM-based safety guardrail

Graduate Research Assistant

Apr. 2017 – Aug. 2021

University of Washington: Geometric Data Analysis Group

Seattle, WA

- Pioneered spectral clustering generalization to higher-order topological features (*NeurIPS'21* oral, <1% acceptance rate) [2]
- Identified and analyzed a key failure mode in spectral embedding methods for complex manifolds (*NeurIPS'19* [7])

Machine Learning Intern

Jun. 2020 – Sep. 2020

Facebook

Seattle, WA

- Optimized search ads recommendation system (recsys) via multi-task learning, achieving Normalized Entropy (NE) gain

Research Intern

Jun. 2018 – Sep. 2018

Microsoft Research (MSR)

Redmond, WA

- Developed scalable dynamic social networks models with causal intervention framework (*KDD'19* [8])
- Partnered with AI for Good Lab on cross-disciplinary wildlife social network analysis (*Animal Behaviour* [3])

EDUCATION

University of Washington

Seattle, WA

Ph.D. in Electrical Engineering

Sep. 2016 – Aug. 2021

National Taiwan University

Taipei, Taiwan

B.S. in Physics

Sep. 2011 – Jun. 2015
